

VOODOO LAB

GCX Worksheet

Stereo Parallel

This setup has two pedals before a TriAxis preamp that is wired so that it's on all the time. The signal then hits a Backtalk reverse delay and goes into a Roland M-120 line mixer. The mixer is responsible for running the t.c. electronic 1210 chorus/spatial expander and G-Force in parallel before going stereo into an Intellifex, and eventually the power amp.

Functions:

- | | | | |
|---------|------------------------|---------|--|
| Loop #1 | <u>PEDAL 1 ON/OFF</u> | Loop #5 | <u>1210 ON/OFF</u> |
| Loop #2 | <u>PEDAL 2 ON/OFF</u> | Loop #6 | } <u>INTELI-FEX (R) ON/OFF</u>
<u>SWITCH TOGETHER</u> |
| Loop #3 | <u>BACKTALK ON/OFF</u> | Loop #7 | |
| Loop #4 | <u>G-FORCE ON/OFF</u> | Loop #8 | _____ |
